
Drosophila chr3L validation — classwise calibration (50 bins)
non_CDS (true bases: 159,754)
frame_0 (true bases: 9,311)
frame_1 (true bases: 9,175)
frame_2 (true bases: 9,210)
Observed fraction of the state
Predicted probability
Perfect calibration
Before (T=1)
After (T=1.459)
0.0
0.2
0.4
0.6
0.8
1.0
Each point groups bases by that state's predicted probability; marker size reflects bin count.
